

Voya Solution PortfoliosSM (Target Date)

These portfolios are only offered as an investment option within variable products and retirement programs.

The Portfolios started the quarter favoring equities over fixed income, with overweight positions in domestic large blend, international developed and emerging market equities, funded by underweights in core U.S. fixed income, high yield and short duration bonds.

At the close of April, we made adjustments to our strategic asset allocation targets to reflect our revised long-term capital market expectations for a range of asset classes. This resulted in modest changes in our sub-asset allocations. The most notable changes included modest increases to international developed and emerging market equities, a shift from growth to value within U.S. large cap and reduced exposure to global bonds in favor of core U.S. fixed income. In addition, long government bonds were removed as a strategic asset class but the Portfolios maintain a small tactical allocation to them for duration management purposes. Finally, to maintain equity weights through the annual glide down process, a tactical overweight to equities was enacted for the 2035-2020 Portfolios.

In June, the Portfolios tactically rotated the U.S. equity portion towards growth to offset the value bias in its strategic allocation. The Federal Reserve's firm resolve for gradual interest-rate increases, two straight disappointing inflation readings and continual problems besetting the Trump Administration's agenda has turned to favor a growth-tilted market.

Overall, tactical moves during the quarter had a mixed impact on performance, positive for near-dated Portfolios and negative for far-dated Portfolios.

Underlying Managers

The top performers relative to their respective benchmark include VY T.Rowe Price Growth Equity, Voya Multi-Manager International and Voya Global Bond. Weakest performers relative to their respective benchmark include Voya Small Company, Voya MidCap Opportunities and Voya Multi-Manager Mid Cap Value.

Overall, underlying manager selection had a positive impact on performance.

INVESTMENT MANAGEMENT

Reliable Partner | Reliable Investing®

Voya Solution PortfoliosSM (Target Date)

Principal Risks: There is no guarantee that any investment option will achieve its stated objective. Principal value fluctuates and there is no guarantee of value at any time, including the target date. The target date is the approximate date when an investor plans to start withdrawing his or her money. When their target date is achieved they may have more or less than the original amount invested. For each target-date portfolio, until the day prior to its target date, the Portfolio will seek to provide total return consistent with an asset allocation targeted at retirement in approximately each Portfolio's designated target year. On the target date, the Portfolio's investment objective will be to seek to provide a combination of total return and stability of principal consistent with an asset allocation targeted to retirement.

Stocks are more volatile than bonds, and portfolios with a higher concentration of stocks are more likely to experience greater fluctuations in value than portfolios with a higher concentration in bonds. Foreign stocks and small and mid cap stocks may be more volatile than large cap stocks. Investing in bonds also entails credit risk and interest rate risk. Generally, investors with longer timeframes can consider assuming more risk in their investment portfolios. The Voya Solution Portfolios are actively managed and the asset allocation is adjusted over time. The Portfolios may merge with or change to other portfolios over time. Refer to the prospectus for more information about the specific risks of investing in the various assets classes included in the Voya Solution Portfolios.

As with any portfolio, you could lose money on your investment in the Voya Solution Portfolios. Although asset allocation seeks to optimize returns given various levels of risk tolerance, you still may lose money and experience volatility. Market and asset class performance may differ in the future from historical performance and the assumptions used to form the asset allocations for the Voya Target Solution Trust. There is risk that you could achieve better returns in an underlying portfolio or other portfolios representing a single asset class than in the Voya Solution Portfolios.

Important factors to consider when planning for retirement include your expected expenses, sources of income and available assets. Before investing in the Voya Solution Portfolios, weigh your objectives, time horizon and risk tolerance. The Voya Solution Portfolios invest in many underlying portfolios, which are exposed to the risks of different areas of the market. The higher a portfolio's allocation to stocks the greater the portfolio's overall risk. Diversification cannot assure a profit or protect against loss in a declining market.

The share price of the Portfolios normally changes daily based on changes in the value of the securities that the Portfolios hold. The investment strategies used may not produce the intended results. The principal risks of investing in the Portfolios and the circumstances reasonably likely to cause the value of your investment in the Portfolios to decline include: asset allocation risk, credit risk, debt securities risk, equity securities risk, foreign investment risk, growth investing risk, inflation-indexed bonds risk, interest rate risk, market and company risk, real estate risk, REITs risk, U.S. Government securities and obligations risk, derivatives risk and value investing risk. If you would like additional information regarding the risks of the Portfolios' underlying funds, please see "Description of the Investment Objectives, Main Investments and Risks of the Underlying Funds" and the "More Information on Risks" sections of the Prospectus.

You should consider the investment objectives, risks, and charges and expenses of the variable product and its underlying fund options; or mutual funds offered through a retirement plan, carefully before investing. The prospectuses/prospectus summaries/information booklets contain this and other information, which can be obtained by contacting your local representative or by calling (800) 386-3799. Please read the information carefully before investing.
