

# Voya Corporate Leaders® Trust Fund

Series B:  
LEXCX

## Companies That Have Stood the Test of Time

With virtually the same blue-chip companies it held in 1935, this passively managed trust has kept pace with the Dow Jones while outperforming the S&P 500 over the past 30 years.

### Invests in historical market leaders

The Trust's founders believed companies that could prosper in the Great Depression would succeed in all economic and market conditions.

### Some of the largest and historically most stable blue-chip companies

Since holdings cannot be sold except in rare cases, the Trust holds most of the same stocks it had in 1935 — or their direct descendents.

### Over 75 years of historically strong performance

The Trust investments — a fixed list of 20 blue-chip companies — have performed well through both prosperous and turbulent economic times.

## Voya Corporate Leaders® Trust Has Historically Kept Pace with the Dow While Outperforming the S&P 500

### Growth of \$10,000

Source: Morningstar®, Inc., as of 12/31/16.

**Past performance does not guarantee future results.** Excludes sales charges. If sales charges and taxes had been included, the value would have been lower. An index does not reflect fees, brokerage commissions, taxes or other expenses of investing. **Investors cannot directly invest in an index.**

The Fund is a long-term investment. Prior to investing, investors should consider their ability to pursue investing in successive trusts, if available. Investors should also be advised that the sponsor may terminate the unit investment trust (UIT) earlier than the specified liquidation date of the trust.

An investor should consider the investment objectives, risks, charges and expenses of the Fund(s) carefully before investing. For a free copy of the Fund's prospectus, or summary prospectus, which contains this and other information, visit us at [www.voyainvestments.com](http://www.voyainvestments.com) or call (800) 992-0180. Please read the prospectus carefully before investing.

The performance quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. The investment return and principal value of an investment in the Portfolio will fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. For performance information current to the most recent month-end, please visit [www.voyainvestments.com](http://www.voyainvestments.com). Returns for other share classes will vary due to different charges and expenses. Performance assumes reinvestment of distributions and does not account for taxes.

The Voya Corporate Leaders® Trust Fund discussed may be available to you as part of your employer sponsored retirement plan. There may be additional plan level fees resulting in personal performance to vary from stated performance. Please call your benefits office for more information.

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year.

The **Dow Jones Industrial Average** is a price-weighted average of 30 significant stocks traded on the New York Stock Exchange and the NASDAQ. The index does not reflect fees, brokerage commissions, taxes or other expenses of investing. The **Standard and Poor's 500 Index** is an unmanaged capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. The index does not reflect fees, brokerage commissions, taxes or other expenses of investing. **Investors cannot directly invest in an index.**

**Investment Risks:** All investing involves risks of fluctuating prices and the uncertainties of rates of return and yield inherent in investing. Investing in funds that are **concentrated** in a smaller number of holdings poses greater risk than funds with a larger number of holdings because each investment has a greater effect on the Fund's performance. The value of a participation fluctuates with the market value of the underlying portfolio securities of the Trust. The dividend income, if any, from the portfolio securities is subject to fluctuation which in turn will affect the amounts of distributions made to participants. An investor in the Trust has **no assurance against loss in a declining market**, and redemption at a time when the market value of the participations is less than their cost will result in a loss to the investor.

#### Taxation:

For Federal income tax purposes, (1) the Trust will be treated as a fixed investment trust and will not be subject to Federal income tax, (2) each participant will be treated as the owner of his pro rata portion of the common stock of the corporations held by the Trust, (3) each participant will be required to include in his gross income his pro rata portion of the dividends and interest received by the Trust (including the amounts of such dividends and interest that are not distributed to participants but are used to pay the fees and expenses of the Trust), at the time such dividends and interest are received by the Trust, not at the later time such dividends and interests are distributed to participants or reinvested in additional participations, and (4) each individual participant who itemizes deductions may deduct his pro rata portion of the fees and expenses of the Trust only to the extent such amount, together with his other miscellaneous itemized deductions, exceeds 2% of his adjusted gross income. Please see the prospectus for further information.
